PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of production experience building scalable distributed systems, FastAPI microservices, TypeScript and Next.js 14 web applications, PostgreSQL databases, and LLM multi-agent orchestration pipelines using Google Gemini and Groq.

EXPERIENCE

Staff AI & Backend Engineer - CloudScale AI (2022 - Present)

- Architected and deployed high-throughput Python 3.11 FastAPI services handling 15,000 req/sec with <40ms p95.
- Built structured JSON LLM evaluation pipelines with Pydantic validation, retry backoff, and provider fallbacks.
- Designed PostgreSQL schemas with Row Level Security (RLS), indexing, and automated audit logging in Supabas
- Led frontend architecture in Next.js 14 App Router, TypeScript, and Tailwind CSS for real-time analytics.

Full-Stack Software Engineer - FinTech Core (2019 - 2022)

- Developed REST APIs in Python and TypeScript, integrated Docker/Kubernetes CI/CD pipelines, and wrote comprehensive pytest and Playwright test suites achieving 94% code coverage.

SKILLS

Python, FastAPI, TypeScript, Next.js, React, PostgreSQL, Supabase, Docker, Redis, Pytest, LLM Agents, Git

EDUCATION

B.S. in Computer Science, University of California, Berkeley
